

1       **In the Specification**

2       Please replace the text appearing on page 7, lines 11-13 with the following:

3  
4               Figs 31-~~36~~37 graphically illustrate various matrix switch  
5       programming grid states at select points in generating and configuring the  
6       matrix switch to implement the media processing of Fig. 29.

7  
8       On page 7, please add the following text starting at line 21:

9  
10              Fig. 40 is a block diagram of a system that can be utilized, in  
11       accordance with one embodiment, to impart to objects that support only static  
12       properties, characteristics that enable them to behave in a way that appears as if  
13       they support dynamic properties.

14              Fig. 41 illustrates an example in accordance with one embodiment.

15              Fig. 42 is a flow diagram that describes steps in a method in  
16       accordance with one embodiment.

17              Fig. 43 illustrates a matrix switch in accordance with one  
18       embodiment.
